Garrett County Trivia Game

Rules of Play

About the Game

Garrett County Trivia is a game to test **your** knowledge of **your** County—its history, its government, its terrain and even its people in their pursuit of leisure activities. It is hoped that by playing the game familiarity with the County's rich past will be heightened, together with greater awareness of what makes Garrett County a great place to live.

The game may be played on its own woven game board or may be played on the game board of the internationally famous Trivial Pursuit.™ Although many individuals may be involved in the play of a single game it is recommended that only two individuals or teams play at a time. Garrett County Trivia questions are constructed in such a way as to maximize the challenge even in team play.

Game Equipment

Garrett County Trivia contains 150 question-and-answer cards on six different color-coded stock. For those who have the complete game set—your game pack includes a 13"x 17" woven game board, (suitable as a colorful map wall hanging), a die, two player tokens, and six proficiency score cards (one of each color).

Commence Play

Both players or teams select a token. Players roll the die, with the player rolling the highest number moving first. The player with the first turn rolls the die again, and starting from any category area (on the Garrett County Trivia Game Board, these categories are located at Friendsville, Cranberry Swamp, Deep Creek Lake, Bloomington, Oakland, or Hoye Crest) moves the token the indicated number of spaces in any direction.

When a token lands in a category area, that player or team is asked a question in that category. A single player may choose to be asked only "Easy" questions from each category, while teams of two players may select "Intermediate" questions. It is suggested that teams of three or more players may want to challenge their cumulative brain power by selecting questions from the "Difficult" class. Be advised that a large number of the "Intermediate" class questions are multiple choice type. Each question and answer card has one question from each difficulty class. Answers are on the opposite side of each card.

Difficulty Classes

Easy
Intermediate
Difficult

Color Code Categories

Blue ..... Geography	Brown/Tan ..... Potpourri
Pink ..... Public Affairs	Green .... Science/Nature
Yellow ..... History	Orange ... Sports/Leisure

If the player or team correctly answers the question, the player or team's turn continues with another roll of the die. If the player answers incorrectly, the turn passes. With each die roll, a move can be made in any direction. However, backtracking (a combination of forward and backward moves on one die roll) is not permitted. A player must always move the exact number of spaces shown on the die. Both tokens may occupy the same space.

Winning the Game

When a question is answered correctly while the player or team's token is sitting on that category area that player or team wins a proficiency score in that category represented by a blank color card. The object of the game is to collect proficiency score cards for all of the categories. The player or team to do this first, wins. Good luck!
